

Anthasoft Ltd appoints Stellarnet as Asia Pacific distributor for Anthasoft mobile security products

Kuala Lumpur, July 18th 2006.

In a brief signing ceremony held today at a leading hotel in Kuala Lumpur, Anthasoft Ltd announced the appointment of local MSC Status company, **Stellarnet Sdn. Bhd.** as distributor for the **Anthasoft range of mobile security** products in the Asia Pacific region. Stellarnet will have exclusive distributorship rights in Malaysia.

Steve Wilson, COO, who signed for Anthasoft commented that the appointment of Stellarnet came at an opportune moment for both parties. He noted that according to the recently published Canalsys reports, the global sales of smart mobile devices had grown at a rate of 55 % Year on Year in Q1 2006 with Asia Pacific region alone accounting for almost 7 million units or 46 % of all such devices sold. Steve further added that Anthasoft was delighted to appoint Stellarnet who had vast local knowledge and was confident that Stellarnet will be able to achieve the sales target that had been set, especially in view of additional security products being rolled out by Anthasoft in the coming weeks.

Panir Selvam, Executive Chairman of Stellarnet, who signed on behalf of his company was also delighted at being appointed by Anthasoft as a distributor for the Asia Pacific region. In his speech earlier, Panir had commented that while wireless access was becoming more readily available, wireless security was a major cause of concern. In a controlled demonstration, Stellarnet had earlier shown how easy it was for almost anyone to tap into wireless networks and obtain sensitive information such as emails. He noted that in view of the increased concern over wireless security and the proliferation of business solutions using Smart Devices, the market for Anthasoft's range of mobile security products will be a lucrative one.

Miss. Virginia Entizne, Stellarnet VP for Marketing echoed Panir's enthusiasm when she added "We are confident of achieving the annual sales targets of RM 2 million for Malaysia and RM 10 million for rest of Asia Pacific. The products are really world class and we have an impressive client list which includes the US Department of Defense. We are really excited about our prospects and are already talking to several large prospects including international banks"

Among the products that Stellarnet will distribute are **AnthavPN**, **anthaCrypto**, and **anthaVirus-Protect**.

anthaVPN is a world class security product with up to 512 bit encryption technology that secures the communication between Pocket PC/Palm/Symbian 60 phones and the VPN gateway. The product is endorsed by Microsoft and Palm and current users include US Department of Defense, Singapore Government, Bank of America and so on. It runs on Windows 2003/2005, Symbian Series 60 platform and Palm OS.

anthaCrypto allows users to program the device to act in a specific way, such as blocking the PDA or destroying the information, in the event of unauthorized access. By means of anthaCrypto, the mobile device and all the information contained in it is protected from unauthorized users. Furthermore, the product allows the company to establish an Authentication Management Policy.

anthaVirus-Protect is designed especially to protect pocket devices (PDAs) from viruses. It is a complete antivirus package for PalmOS and WinCE/PocketPC based devices.
